

CLEAN COPY OF AMENDED CLAIMS

1. (Twice Amended) A method of treatment of a scar comprising applying a low viscosity topical fluid silicone which is capable of being dispensed from a squeeze tube to the scar.

2. (Twice Amended) The method of claim 1 further comprising wiping off the excess low viscosity fluid silicone to leave a thin layer of the low viscosity fluid silicone on the scar.

3. (Twice Amended) The method of claim 1 further comprising alternating applications of the low viscosity topical fluid silicone with applications of silicone gel sheeting to the scar.
